PARTICULATE RESPIRATOR N95

FIT AND USE INSTRUCTIONS

WARNING! This respirator protects the user by keeping certain dusts and particles out of the nose, mouth and lungs.

Read all safety warnings, instructions, illustrations and specifications provided. Failure to follow all instructions may result in serious injury or death.

Save all warnings and instructions for future reference. For more information, contact VENUS (Technical Service Dept) at +91-22-27692646 (info@venusohs.com), www.venusohs.com

N95-NISH Certified. At least 95% filtration efficiency against solid and liquid aerosols that do not contain oil.

This respirator contains no components made from natural rubber latex.

For best results, use in well-ventilated areas.

WARNING! Wear respirator at all times during exposure. If it becomes difficult to breathe, or if respirator becomes damaged, immediately go to a clean area and replace the respirator. Leave the contaminated area immediately if dizziness, irritation, or other distress occurs.

Use and Limitations

Respirators are intended to help protect the wearer by reducing their exposure to airborne harmful contaminants from a level that may be hazardous to one that is considered safe or acceptable according to government established levels. Employers must comply with regulations and procedures from federal, state and government agencies, such as OSHA, for selecting, using, and maintaining proper respiratory protection in the workplace.

WARNING! Follow all Use and Limitations instructions. Before occupational use of this respirator, a written respiratory protection program must be implemented meeting all the local government requirements. In the United States, employers must comply with OSHA 29 CFR 1910.134 which includes medical evaluation, training and fit testing.

In Canada, CSA standard Z94.4 fit requirements must be met and/or requirements of the applicable jurisdiction, as appropriate.

This respirator:

- Does not supply oxygen. Do not use in atmospheres containing less that 19.5% oxygen.
- Does NOT filter gases, vapors or odors.
- Does NOT eliminate the inhalation of all particles.
- Does NOT filter oil aerosols, asbestos**, lead, or sandblasting particles.
- Does protect from particles created from sprayed non-oil based liquids.
- protects from sprays that do not also emit oil aerosols or vapors.
- Does filter pollen and mold spores*
- Does filter dust encountered during gardening, cutting firewood, raking, mowing, etc.
- IS designed for adults who are properly trained in its use and limitations.
- IS intended for use by children, pregnant or nursing women, or by individuals with a medical condition that might prevent the use of a respirator, such as asthma, emphysema or a history of heart disease. If you have such a condition consult your health care provider before use.

Retest fit instructions with a new respirator.

Whether you suspect exposure to hazardous contaminants, use this respirator. This respirator is not for use in a torturous environment where the concentration of a toxic substance can occur.

WARNING! If you cannot achieve a proper seal, do not use the respirator.

Storage/Shelf Life

Before use, keep respirator sealed in its original packaging and away from contaminants, dust, sunlight, extreme temperatures, excessive moisture and damaging chemicals.

Store opened respirators away from contaminated areas when not in use.

When properly stored within the temperature and humidity conditions specified below, the respirator may be used until the “USE BY” date specified on packaging.

- Use respirators before the “USE BY” date specified on the packaging.
- Storage Temperature Range
  -20°C (–4°F) to +40°C (+104°F)
- Storage Maximum Relative Humidity
  <80% RH

Check with your local authorities for proper disposal of used respirators.

* Mold can grow quickly indoors when moisture accumulates in a home as the result of a flood, plumbing leak, roof leak, etc. Mold spores can cause an allergic reaction or other health effects in some individuals. Contact the United States Environmental Protection Agency (EPA) at www.epa.gov for guidance. Depending on the extent of the problem, it may be necessary to hire a qualified mold remediation contractor. The EPA recommends "Brief Guide to Mold, Moisture, and Your Home" and using safety equipment including N95 rated respirator, safety goggles, and gloves to minimize exposure to mold if you attempt to clean up a small (<3’ x 3’) area yourself. Consult the EPA for additional guidance on how to clean up small mold problems yourself.

** Older homes and buildings may contain types of building products and insulation materials containing asbestos. Asbestos is toxic. If you think asbestos may be in your home, DO NOT touch or disturb the material as this may cause asbestos fibers to be released into the air. Repair or removal of asbestos-containing materials should only be done by a professional trained in methods for safely handling asbestos. Contact the EPA at www.epa.gov for guidance on what to do if you suspect asbestos in your home.
